Hi Kate,

Thanks for the update. From my perspective, I think it's fine to not have a follow-up call with reviewers. I think their comments were fairly clear.

Here is a high-res version of Figure 8. Let me know if you'd prefer to have the shapefiles instead.

Cam

Subject: reviews of Stratus report

Hi Cam and Dave,

Just wanted to touch base with you both about where things stand on the peer review of the Stratus report. We are leaning towards not having a follow-up call with the reviewers, since it sounds like both you and EPA staff feel the comments were straightforward and don't require clarification. Please let me know if this has changed, and you would like us to schedule a call.

We will be incorporating material from the report (with appropriate citation) into the EPA assessment, taking reviewers' comments into account and clarifying or caveating in our text where appropriate. We have no expectations of you in terms revising the report for use in the assessment.

We would like to include Figure 8 from the report in the assessment document. Would you be willing to send us a high resolution version of the figure and/or the data used to create the figure (so we can recreate it)?

Thank you again for submitting the report during the public comment period, and updating it so quickly for the review process. We hope the reviews are useful to you as you move forward with your work.

If you have any questions, please feel free to give me a call at 703.347.8533 any time.

Best,
Kate
